

# Company Information:

## Ryukyu Environmental Management Service Co., Ltd. (REMS)

We support solving organizational management issues in order to utilize management systems such as ISO9001, ISO14001, and ISO27001 as well as vertical integration of primary, secondary, and tertiary industries ("sixth industrialization").

### Salutation

Economically speaking, Okinawa has been greatly blessed with a beautiful natural environment. To maintain economic sustainability while preserving such blessings, organizations and companies must re-think the ideal state of their management.

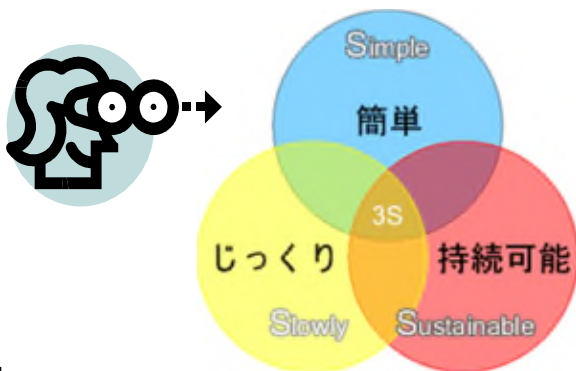

The ISO management system standard is an international standard for frameworks to effectively solve issues facing SMEs and other organizations.

We fully understand regional resources, the traditional culture, and industrial structure while implementing efforts for sixth industrialization, which aims to achieve managerial diversification by integrating the primary, secondary, and tertiary industries.

To contribute to the region, we provide support through consultations catered to customers' needs, various seminars, and other services.

### Basic Support Policy

In order to enable our customers to harness the knowledge and experience we have accumulated in and outside Japan as well as the international standard, which is a management tool, our support service is based on the following three S's.

#### **Slowly**

We take time ("slowly") to listen to managers in order to support establishing systems that lead to ideal future states.

#### **Simple**

We support making frameworks that are simple and easy to operate as well as catered to each organization as much as possible in order to free them from trouble in the future.

#### **Sustainable**

We support developing human resources who are able to find their own issues and improve the frameworks in a sustainable manner by establishing a system.

### Scope of Business

- Consulting to support the establishment of ISO9001, ISO14001, and ISO27001 management systems
- Training to develop internal auditors and personnel in charge of system establishment
- Continuous support for improvements after accreditation, internal audit support, implementation of mock accreditation reviews, support for accreditation review preparation, and outsourcing services
- Support, information collection, and spreading to develop sixth industries of agriculture, forestry, and fisheries as well as environmentally friendly sixth industrialization
- International cooperation through the above services

### Our Qualifications

- Environment
  - ISO14001 chief reviewer
  - First class water pollution prevention manager
  - Registered expert at the Okinawa SME Support Center
  - First class small vessel operator, licensed diver
- Quality
  - ISO9001 chief reviewer
- Information
  - ISO27001 chief reviewer
  - Information processing system audit technician
  - Special class information technology engineer
  - Class 1 information technology engineer

Various problems occur during the process of system establishment, which burdens the personnel in charge. We are a local company in Okinawa, so we can respond to problems quickly. We strongly support establishing systems through quick communication. We contribute to addressing customers' problems and use our local network to make them smile.
